PROFESSIONAL SUMMARY

Python Full Stack Developer with hands-on experience building scalable web applications, REST APIs, and distributed systems using Django, Django REST Framework, React.js, MySQL, and AWS. Skilled in microservices architecture, JWT authentication, WebSockets, Docker, Nginx, and CI/CD workflows with a strong focus on performance and clean code.

TECHNICAL SKILLS & TECHNOLOGIES

Backend: Python, Django, Django REST Framework, RESTful APIs, JWT Authentication, OAuth 2.0, WebSocket, Microservices Architecture, RBAC, API Integration, Authentication, Authorization, CRUD Operations, JSON, Scalable Backend Systems, Django Channels

Frontend: HTML5, CSS3, JavaScript, React.js, Tailwind CSS, Bootstrap, Responsive Web Design, Cross-Browser Compatibility, Component-Based Architecture, State Management, Lazy Loading, API Integration

Databases: MySQL, SQL, Database Design, Query Optimization, Relational Databases, Data Modeling, Database Optimization

Cloud & DevOps: AWS EC2, AWS S3, AWS RDS, Docker, Nginx, Gunicorn, Linux, CI/CD, Containerization, Deployment, Reverse Proxy, Redis

Tools: Git, GitHub, Postman, REST API Testing, Version Control, Debugging, Agile Development

PROFESSIONAL EXPERIENCE

Junior Developer | SMEC Technologies

- Engineered scalable backend systems using Django and MySQL with clean, maintainable architecture and efficient business logic implementation.
- Optimized database queries and reduced response time by 60–70%, improving overall application performance and user experience.
- Developed and maintained RESTful APIs with request validation, JWT authentication, and role-based access control (RBAC) to ensure secure data exchange.
- Managed application deployment and infrastructure using Docker, AWS EC2, Nginx, and Gunicorn while supporting API testing and version control workflows.
- Collaborated through code reviews, debugging, and version control best practices using Git and Agile Development methodologies.

SOFTWARE ENGINEERING PROJECTS

Labora – Freelancing Platform (Microservices Architecture)

[source](#)

Technologies: Django REST Framework, MySQL, Docker, WebSocket, Nginx, JWT RS256

- Developed a microservices-based freelancing platform with separate services for authentication, messaging, job management, payments, and user profiles.
- Implemented RS256 JWT authentication and role-based access control (RBAC) across services.
- Built real-time messaging using Django Channels, Redis, and WebSocket, delivering message updates in under 200ms.
- Containerized services using Docker and configured Nginx reverse proxy for deployment and load balancing.
- Integrated Redis as a channel layer for asynchronous communication between services.

Multimart – Multi-Vendor E-Commerce Platform

[livelink source](#)

Technologies: Django, Tailwind CSS, JavaScript, MySQL, Razorpay, OAuth, AWS, WebSocket, Nginx, Gunicorn

- Architected and deployed a scalable multi-vendor marketplace with role-based dashboards for vendors and administrators.
- Implemented real-time order notifications using WebSocket and integrated Razorpay payment gateway with OAuth authentication.

- Built modules for cart, wishlist, checkout, reviews, and order tracking with complete CRUD operations.
- Deployed application on AWS EC2, S3, and RDS using Nginx and Gunicorn for high-performance serving.

Hiremo – Skill Exchange and Work Hiring Platform

Technologies: Django, JavaScript, Bootstrap, MySQL, OpenCV

- Built a service marketplace with provider verification and skill management for secure transactions.
- Integrated face recognition using OpenCV and Haar Cascade for biometric verification and user authentication.
- Developed real-time messaging and secure payment functionalities with proper authorization mechanisms.
- Improved platform security and user experience through modular architecture and clean code practices.

EDUCATION

B.Sc. Computer Science Prajyoti Niketan College, Pudukad - 2025

Higher Secondary (Computer Science) St. Thomas HSS, Thrissur | 2020 – 2022

PROFESSIONAL CERTIFICATIONS

- IBM – Developing Front-End Apps with React (Credential ID: WPO8HDOGK113)
- Backend Developer Certification – STEYP (Certificate ID: kkp4008himzd5d zd1ydk)
- UI Engineer Certification – STEYP (Certificate ID: muc1ynccsq3c7k0igeo)
- Google AI Essentials (Credential ID: QE9T75VXBNKN)
