PROFESSIONAL SUMMARY

Python Full Stack Developer with knowledge in building back-end systems, REST APIs, and responsive web applications. Skilled in **Python, Django, Django REST Framework, MySQL, HTML, CSS, JavaScript, Docker, and AWS**. Familiar with authentication systems, **micro-services architecture**, and **WebSocket** integration. Able to develop clean and scalable applications with a focus on performance, problem-solving, and continuous learning.

TECHNICAL SKILLS

- **Backend Development:** Python, Django, Django REST Framework, REST APIs, JWT Authentication, WebSocket, Micro-services Architecture
- **Frontend Development:** HTML5, CSS3, JavaScript, React.js, Tailwind CSS, Bootstrap, Responsive UI/UX Design
- **Databases & Cloud:** MySQL, AWS RDS, AWS S3 Bucket, AWS EC2, Database Design & Optimization
- **Tools & Deployment:** Git, GitHub, Docker, Nginx, Gunicorn, Postman, RESTful API Testing, Version Control

PROFESSIONAL EXPERIENCE

Junior Developer

SMEC Technologies

- Engineered scalable backend systems with **Django** and **MySQL**, delivering clean, maintainable architecture for reliable data workflows and business logic implementation.
- Optimized query performance and eliminated database bottlenecks, reducing backend response time by 60-70% and improving overall system efficiency.
- Developed modular **REST API** endpoints with comprehensive form validation, role-based access control, and reusable business logic components.
- Managed deployments across **Git, GitHub, Docker, Postman**, and **AWS** infrastructure, streamlining **CI/CD** pipelines and accelerating release cycles.
- Enhanced team collaboration through structured code reviews, pair programming, and adherence to best practices in version control and documentation.

PROJECTS

HireMe: Skill Exchange and Work Hiring Platform

Django, HTML5, CSS3, JavaScript, Bootstrap, MySQL, Haar Cascade, OpenCV

- Built a modern service exchange platform connecting users with verified professionals, implementing comprehensive provider verification and skill management.
- Integrated face recognition technology using Haar Cascade for biometric verification, enhancing platform security and user trust.
- Developed in-app messaging system for seamless communication between service providers and clients.

- Integrated third-party payment system with comprehensive transaction handling and security protocols.

Multimart: E-Commerce Platform

[livelink source](#)

Django, Tailwind CSS, JavaScript, MySQL, Razorpay, OAuth, WebSocket, AWS (EC2, S3, RDS), Nginx, Gunicorn

- Architected and deployed a scalable multi-vendor marketplace with role-based dashboards for admin, sellers, and customers, managing complex workflows and permissions.
- Implemented real-time order notifications using WebSocket, reducing order processing time .
- Developed comprehensive customer modules including cart management, wishlist, checkout flow, product reviews, and order tracking with secure payment integration.
- Integrated Razorpay payment gateway and Google OAuth authentication, ensuring secure transactions and seamless user access without compromising data integrity.
- Deployed on AWS infrastructure with EC2, S3, RDS, and Nginx reverse proxy, achieving high availability and optimizing resource utilization.

Labora: Freelancing Platform (Microservices Architecture)

[source](#)

Django REST Framework, MySQL, Docker, WebSocket, Nginx, JWT RS256, Microservices

- Designed and deployed a distributed microservices-based freelancing platform with independently managed services for authentication, job management, messaging, payments, and user profiles.
- Implemented JWT-based authentication using RS256 public/private key verification with role-based access control across distributed microservices.
- Developed real-time communication infrastructure using Django Channels and WebSocket.
- Configured Docker containerization and Nginx reverse proxy routing to ensure service isolation, scalability, and efficient load distribution.
- Built modular RESTful APIs for job posting, freelancer applications, payment tracking, reviews, and admin monitoring with comprehensive error handling.

EDUCATION

B.Sc. Computer Science

Prajyoti Niketan College, Pudukad - 2025

Higher Secondary (Computer Science)

ST Thomas HSS, Thrissur - 2020-2022

PROFESSIONAL CERTIFICATIONS

- IBM - Developing Front-End Apps with React (Credential ID: WPO8HDOGK113)
- Backend Developer Certification (STEYP - Certificate ID: kkp4008himzd5dzd1ydk)
- UI Engineer Certification (STEYP - Certificate ID: muc1ynccsq3c7k0igeo)
- Google AI Essentials (Credential ID: QE9T75VXBNKN)

LANGUAGES

- English
- Malayalam
- Tamil
